BLOCKCHAIN POWERED SOCIAL IMPACT

Empowering young women through technology. A portion of proceeds from token sale goes towards our mission

Empowering the next generation of leaders

47% of Ethiopian girls who start grade one do not make it to grade five. (UNICEF)

ECOLE

ECOLE IS A SOLUTION TO A WORLDWIDE PROBLEM.

Did you know there are approximately 33 million fewer girls than boys enrolled in elementary or primary schools in the world? (Wolfe,278) In the developing world there is a chance of 1 in 4 girls being born into poverty.

In most developing nations, there are virtually zero options for one to access free early, pre-college education. This issue often forces many, especially young girls to drop out of school.

Many families, given the scarcity of resources, will choose to educate boys and not their girls. They choose to do so with the assumption that girls get married and leave the family while boys stay home and take care of their parents. They may also opt to marry the girl child off as a result of cultural norms and traditions.

The result of having girls' education cut short leads to limiting career development and low paying jobs in the future, resulting in poverty, as well as a lower quality of life. Thus, putting her at a heightened risk of domestic abuse.

Ecole's Mission

To empower young women through technology.

Ecole is a cryptocurrency project that will aim to donate a portion of its proceeds to help fund education of the girl child. Ecole is a 100% community based decentralized community project. When many people work together for a single cause, great things are accomplished and many lives are changed for the better.

By providing funds to fund girls' education, the girls' lives and their families benefit from better jobs and higher wages, decreased rates of HIV infection and overall better health. Communities benefit from use of more productive farming methods which leads to less malnutrition and reduced infant mortality rate.

The education of women brings more participation in politics and social projects and more autonomy in their lives on decisions that affect them and their lives (Wolfe 279).

Participation in this project will help struggling families educate their children in hopes of a brighter future for their lives and their communities. Thank you for your participation and thank you for your humanity.

Just 39 percent

According to global statistics, just 39 percent of rural girls attend secondary school. This is far fewer than rural boys (45 percent), urban girls (59 percent) and urban boys (60 percent).

Education is life

Children of mothers with no education in the Latin American and Caribbean region are 3.1 times more likely to die than those with mothers who have secondary or tertiary education, and 1.6 more likely to die that those whose mothers have primary-level education.

In Cambodia

48 percent of rural women are illiterate compared to 14 percent of rural men.

In Pakistan

A half-kilometre increase in the distance to school will decrease girls' enrolment by 20 percent. In Egypt, Indonesia and several African countries, building local schools in rural communities increased girls' enrolment.

Key factor

Data from 68 countries indicates that a woman's education is a key factor in determining a child's survival.

UN WOMEN

Ecole's Values

Eco-friendly

The idea of a paperless environment is one that we can all get behind.

Transparency

This is the essence, the whole point of making blockchain our main driver in our quest to make education more affordable for girls and young women all over the world.

Common good

Holders of our charity tokens all have one thing in common: That is to do as much good in the world as we can using the gifts we have been blessed with.
